

iCloud

Wirelessly syncs your data across multiple devices.

To access your iCloud on a PC, in your browser navigate to www.iCloud.com. You will be prompted to enter your Apple ID and password. iWork contains documents and presentations from the Apple Office programs: Pages, Keynote, and Numbers (Word, PowerPoint, and Excel equivalents).

To upload documents from your PC to your iCloud, click on the settings gear in the upper right-hand corner of Pages, Keynote, or Numbers and select Upload Document. You can upload Word, Excel and some PowerPoints into iCloud.

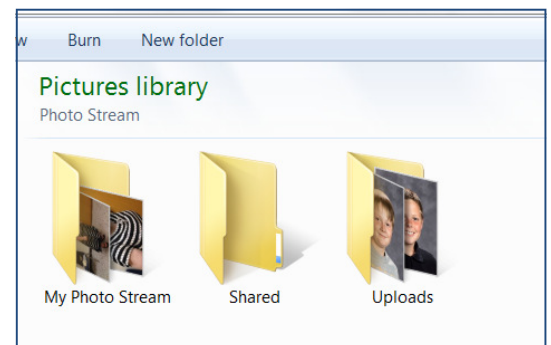

To sync Photos and upload/download photos from your Apple devices to your PC and from your PC, you must download the iCloud Control Panel for Windows (link: <http://support.apple.com/kb/DL1455>). Once installed, open the Control Panel on your computer and choose which things you would like synced. For Photo Stream Sync (turn on PhotoStream in your device: Settings, iCloud): the iCloud Control Panel will create a folder in your Pictures location called "Photo Stream".

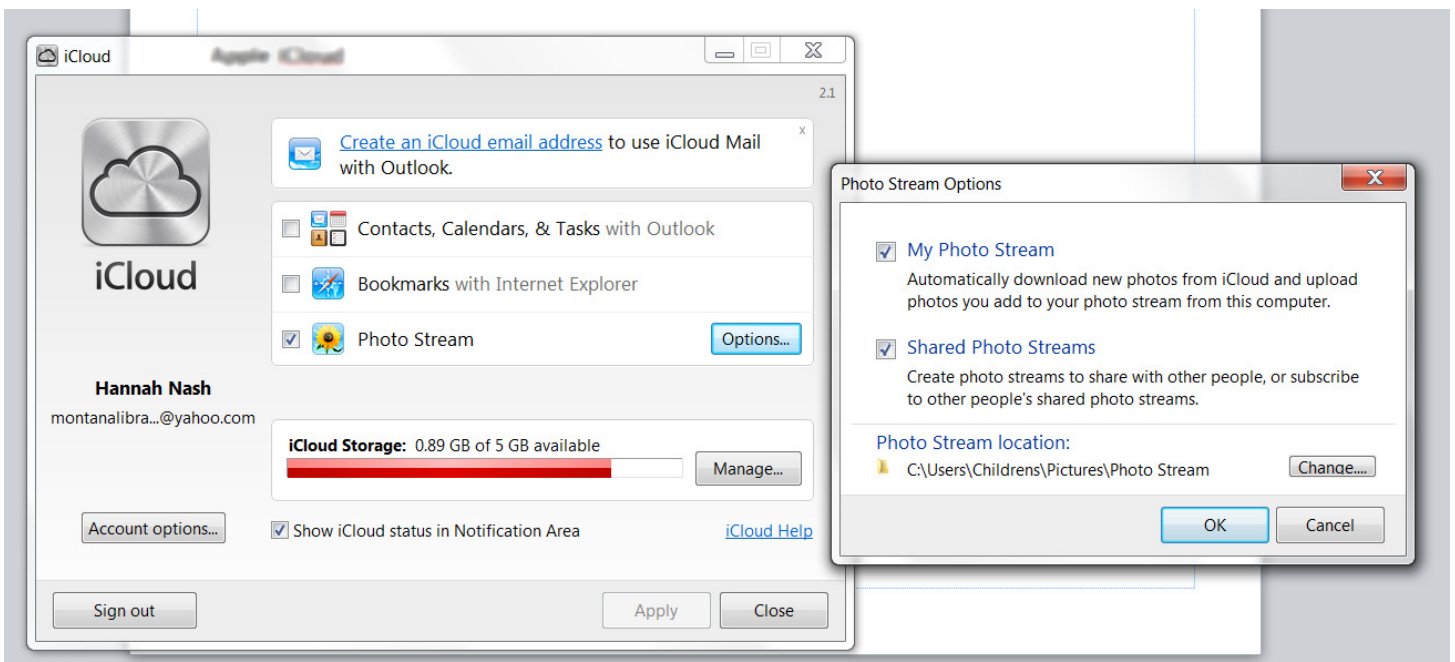

Inside the "Photo Stream" folder are other folders:

My Photo Stream: To view photos off of your iPad or iPhone

Uploads: Place any photos from your PC that you would like to access on your iPad or iPhone in this folder; photos will sync to your device's Photo Stream when connected to WiFi.

Apple iCloud Control Panel

Suggested Apps

YouTube: after the new update, sometimes the YouTube App disappeared. Best way to view YouTube videos on Apple devices.

TV/Movies: Netflix (monthly subscription fee), HULU Plus (\$7.99 per month), VUDU (facilitates “rented” movies, cost per film). Crackle is Sony’s free video network. HBO Go (if you pay for HBO service in your home).

Social Networking: Facebook, Facebook Messenger, Twitter for iPad, Tweetdeck or Tweetbot.

Free Library Books: If you are interested in downloading library books in eBook format (see attached step-by-step handout).

Buying eBooks: iBook, Kindle, Nook. Install all three Apps, and price compare between the three for the best digital book deal.

Shopping: Amazon, Etsy, eBay, Our Groceries (text and sync grocery/shopping lists between multiple devices).

Chat: Skype for face-to-face calls and texting, FaceTime for Apple-to-Apple device calls (you need to activate your FaceTime in Settings with a contact Email address that you will receive FaceTime calls through; your iPhone defaults to your cell number). Free texting App: TextPlus.

Google Drive: If you use the Google Docs Suite of free office/cloud sharing products, this App will manage your Google content very effectively.

Dragon Dictation: takes verbal dictation to share via Email, Facebook, Twitter, etc.

Dropbox: free cloud storage for use across multiple platforms; PC, Mac, iPad, Droid, etc. Does not allow for in-App editing, but extremely useful for sharing on the go, to access content from home or office.

Note Taking: EverNote is cloud-based note taking system that works across multiple platforms. Supports tagging, photos, voice/audio.

Sports: ESPN ScoreCenter XL,

Art/Culture: MoMA AB Ex NY (Expressionist art and publications on your iPad), The Warhol: DIY POP (create your own digital silk screen, App supports Carnegie Museum of Pittsburgh, \$0.99), LIFE for iPad (Photos from the iconic publication), TED (TED Talk videos), iPoe (interactive Edgar Allen Poe),

Music: GarageBand for music creation (\$4.99), Pandora for free music listening.

Artist: SketchBook Pro (\$7.99) professional level paint program.

Food: Epicurious, Substitutions (\$0.99).

Just Cool: Google Earth, HowStuffWorks HD, NASA App HD, FlipBoard (a social network, blog, reader aggregator), InstaPaper \$4.99 (saves online content to browse for when you are offline).

Office Suggested Apps

Pages: This is the Apple equal of Microsoft Word or Open Office. Compose letters, insert pictures, make flyers, etc. A very complete word processing program. Once you have completed a document, you can email or transfer it in one of three formats: Word, PDF, or as a Pages file for use on a Mac.

Numbers: Works as a great Excel equal on the iPad, iPhone, or Mac computer. Once a spreadsheet is created, it can be emailed or transferred in one of three formats: Excel, PDF, or as a Numbers file for use on a Mac.

Each of these Suites is a one-time purchase of \$9.99. Only required to purchase it for one device (if you have already purchased it for iPad, you can download it onto your iPhone for free).

Photo/Video Editing Apps

iPhoto for iPad: Apple photo editing product; best of the best for photo editing (\$4.99)

Color Magician: Allows selective coloring of photos (all black and white with colored flowers, for example). Very easy to use at (\$0.99). Another good option is Photo Splash at (\$0.99).

FX Photo Studio HD: Highly rated general photo editing App. Varies in price, currently on sale for (\$1.99).

PicShop Lite- Photo Editor: FREE, lite version of PicShop Full version (\$4.99). Lots of good options.

Sketch Me: Makes photos look like pencil sketches (\$0.99).

Photo Collage: FREE for a limited time. Allows you to create a photo collages and save them as single photos; lots of combination options.

Instagram: FREE, but has a huge social networking component.

Vintage (\$0.99) has wonderful filters and options for frames. Snapseed (\$4.99) has tilt, edit, fade, blur, options.

iMovie: Apple software for editing and creating movies, best of the best (4.99).
